Subject: Niagara Falls Boulevard Radiological Site

Good Afternoon:

My name is Eric Daly. I am an On-Scene Coordinator with the US EPA. I have been assigned the Niagara Falls Boulevard Radiological Site in Niagara Falls, NY. The site consists of two parcels, namely 9524 and 9540 Niagara Falls Boulevard. I am currently just touching base with the different agency representatives and attempting to contact the property owner/operators. I corresponded with Andrew Fessler (US EPA Pre-Remedial Program). I believe you have worked with him in the past. I have been given his assessment information and need to build on that. The site does not qualify to be a remedial site. However, it has been referred to me for a removal action. This will take more assessment work and potential shielding and/or removal of contaminated material. My first steps are to contact property owner and operators. Are you the operator of Rapids Bowling Alley? Are you also the owner of the property? If not, could you please provide the property owner information?

Please let me know if you have any questions.

Thanks for your assistance.

Regards,

Eric
